ACTING MUNICIPAL MANAGER

TERMS OF REFERENCE FOR APPOINTMENT OF A SERVICE PROVIDER FOR COMPILATION OF A 20 YEAR SPATIAL DEVELOPMENT PLAN (SDP) 2022/2023

1. Introduction & Background

The Municipal Systems Act, 2000 (Act 32 of 2000) and the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) require that Municipal Spatial Development Frameworks (SDF) “determine a Capital Expenditure Framework (CEF) for the Municipality’s development programmes, depicted spatially”. The development of a 20-year SDP is intended to link the ADM spatial development strategies more effectively with the ADM budget and the budgets of other government stakeholders in terms of the existing backlogs and future demands.

A long-term SDP aims to set the financial parameters and define a prioritised capital expenditure programme. An SDP is fundamental in the translation of the ADM SDF into capital programmes for implementation through the ADM IDP and related municipal budgeting processes.

One of the contributing factors to the lack of spatial transformation is that strategic policies seldom lead to long term implementation at the municipalities. Implementation and specifically budget-spending tend to focus on short-term mechanisms which are further entrenched in the 5-year programmes e.g. Integrated Development Plan (IDP) and the 3-year budget cycles (contained in the Medium-Term Revenue and Expenditure Framework). Ideally, the infrastructure and built environment programmes articulated in the 5-year Integrated Development Plan should align with the spatial objectives of the ADM SDF, which is a 20-year plan for the management of the physical growth and development of the municipality.

Annual assessments of ADM IDPs have generally shown a poor linkage between the spatial strategies and proposals articulated in the ADM SDF. There is also poor linkage between the proposed location of budgeted infrastructure investment and built environment programmes within the ADM. This misalignment is fundamentally challenging and must be addressed.

2. Objective and Outcomes

There is a need to lengthen the planning horizon and it is necessary to encourage decision-makers to take a longer-term view. A view that appreciates that decisions taken at the current timeline are the foundation for the ADM spatial form, infrastructure network and financial standing for the years and decades ahead.

The compilation of a 20 – year Spatial Development Plan will offer a mechanism through which the municipality’s long-term strategic development vision truly directs infrastructure programmes implementation whilst remaining conscious of the municipality’s financial position and infrastructure planning needs.

2.1 Outcomes

Outcomes of the projects are as follows:

- 2.1.1.** The ADM SDF being fully compliant with Spatial Planning Land Use Management (Act 16 2013.)
- 2.1.2.** The ADM SDF being implementable while guiding infrastructure development in short and long-term basis.
- 2.1.3.** Geographic Information Systems (GIS) data repository for project.

3. Scope of Work

- 3.1.** The successful service provider appointed is expected to utilise the ADM Draft SDF 2023/2024 as the base reference information source to compile and submit a 20-year Spatial Development Plan (SDP) focused on the following:

 - 3.1.2.** Segmentation of the long-term vision coupled with sector plans & strategies contained in the SDF into 5-year plans over a 20 - year period informing the production of a Capital Investment Framework & Capital Expenditure Framework.
 - 3.1.3.** Clearly identify key projects that are implementable in compilation of the SDPs and prioritise catalytic projects as contained in the ADM District Development Model (DDM) One Plan in terms of implementation that must be incorporated into the SDPs.
 - 3.1.4.** Production of maps for the SDPs that depict the spatial form and transformation that will be attained over the 20 – year period. The maps must be produced at intervals of 5 – years culminating in the 20th year.

The details of these standards are outlined below.

1.1 Data Format

- All GIS data must be supplied in ESRI ArcGIS 10.8 Shapefile Format that is backwards compatible with later versions of ArcGIS.

- In the event that shapefiles are grouped into layer files for mapping purposes ensure that the group layer files are saved in the shapefiles folder as stated in 1.4 (Map References).
- Datasets or shapefiles to be delivered must conform to a co-ordinate system of the WGS84 ellipsoid using the Hartebeeshoek '94 datum.

1.2 Metadata

All GIS data (each shapefile) must have metadata associated with it. All metadata must be input in a single database table, and named "metadata.dbf. It must be located on the root directory of the distribution media. The required fields for the metadata table are outlined in Table 1 below.

Table 1: URC GIS Metadata requirements

| FIELD NAME | DESCRIPTION |

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Municipal Bidding Document (MBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
 - a. take all reasonable steps to prevent such abuse;
 - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
 - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete
