**AMAJUBA DISTRICT MUNICIPALITY**  
**TERMS OF REFERENCE FOR UNDERTAKING OF BASELINE DATA STUDY FOR**  
**CHARLESTOWN RURAL SERVICE CENTRE**  
**PHASE FOUR 2022/2023**

### **1. Introduction & Background**

A demographic perspective of a municipality allows the observation of not only simple changes in population growth, but also to look at other developments that influence the social lives of every citizen. Demographics allow to emphasize aspects such as gender, race, migration, and life expectancy. Decisions made by politicians as well as by the administration affect, in most cases, at least one aspect of demographics. A good understanding of this dynamic is therefore crucial especially in the case of a predominantly rural municipality such as the Amajuba DM.

To give effect to the Spatial Planning and Land Use Management Act 16 of 2013 (SPLUMA) the principles of spatial justice, spatial sustainability, efficiency, spatial resilience & good administration required for ensuring effective spatial transformation must be adhered to.

The Amajuba DM in the process of reviewing its Spatial Development Framework 2020/2021 & 2021/2022 (SDF) thus identified rural service centres whereby phased baseline data studies have been conducted for rural service centres. The rural service centres that the studies focused on for phase one was for Groenvlei and Kingsley, phase 2 was for Kilbarchan & Normandien whilst phase 3 was for Hattingspruit resulting in themed profiling data generated for both current and prospective timelines that has formed the basis for the Amajuba DM in the applying the SPLUMA related principles in regard to Rural Service Centres.

### **2. Objective and Outcomes**

Phase four of the baseline data study will focus on the rural service centre of Charlestown. The objective of the phase four baseline data study is to enable the Amajuba DM to obtain themed profiling by the development and application of a logical series or set of formulas applicable to the rural service centre in order to generate information focused on prospective demographic, socio-economic & infrastructure indicators to be utilised to undertake strategic planning in order to achieve effective spatial transformation.

## **2.1. Outcomes**

Outcomes of the projects is as follows:

## ANNEXURE B – GIS STANDARDS AND SPECIFICATIONS

### GIS DATA STANDARDS

In order to promote the efficient management of all GIS data within the Amajuba District Municipality, the following set of GIS data standards has been drawn up for GIS related works contracted by the Municipality.

The details of these standards are outlined below.

#### 1.1 Data Format

- All GIS data must be supplied in ESRI ArcGIS 10.8 Shapefile Format that is backwards compatible with later versions of ArcGIS.
- All GPS point data to be supplied in a Dbase (IV) format must be in Degrees, Minutes and Seconds (DMS) and Decimal Degrees (DD).
- All shapefile data must be 100% clean and free of any undershoots overshoots and duplicate entities. All lines must intersect with zero tolerance should the data be line data. All polygon data-sets shall be free of sliver polygons.
- In the event that shapefiles are grouped into layer files for mapping purposes ensure that the group layer files are saved in the shapefiles folder as stated in 1.4 (Map References).
- Datasets or shapefiles to be delivered must conform to a co-ordinate system of the WGS84 ellipsoid using the Hartebeeshoek '94 datum.

#### 1.2 Metadata

All GIS data (each shapefile) must have metadata associated with it. All metadata must be input in a single database table, and named "metadata.dbf. It must be located on the root directory of the distribution media. The required fields for the metadata table are outlined in Table 1 below.

**Table 1: URC GIS Metadata requirements**

### **CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
